EFRAIN RIVAS

• ACTIVE DIRECTORY & AZURE ARCHITECT

SENIOR CLOUD ARCHITECT & INFRASTRUCTURE SYSTEMS ENGINEER

Cary, NC (908) 845-3667 efrain.acetech@gmail.com linkedin.com/in/efrain-rivas-93455a10

github.com/digdast

// 01 PROFESSIONAL PROFILE & ARCHITECTURAL FOCUS

Results-driven **Senior Cloud Architect and Systems Engineer** with 20+ years of hands-on enterprise infrastructure experience designing, modernizing, and automating mission-critical systems across Microsoft Azure, Active Directory Domain Services, Linux, and multi-hypervisor virtualization clusters. Proven architectural track record deploying global multi-site Active Directory forests across 7 global data centers, engineering 5-stage financial CI/CD release pipelines with 99.999% SLA uptime, and implementing zero-touch endpoint provisioning via Microsoft Intune and Windows Autopilot. Creator of high-performance open-source automation tooling (Pulsearr, Renamarr, 50+ Intune remediation modules) with deep expertise in PowerShell, Python, and enterprise identity governance.

// 02 CORE TECHNICAL COMPETENCIES & SYSTEMS MATRIX

▶ CLOUD & DIRECTORY ARCHITECTURE

Microsoft Azure | Entra ID (Azure AD) | Active Directory DS | Hybrid Identity (PHS/PTA) | VNets / NSGs | Azure Files | Group Policy (GPO) | Exchange Online | M365 Tenant Admin

▶ VIRTUALIZATION & HYPERVISORS

VMware vSphere / ESXi | Linux KVM | Citrix XenServer | XCP-NG | Microsoft Hyper-V | Proxmox VE | Azure Virtual Desktop (AVD) | FSLogix Profile Containers | SAN / NFS Clustering

▶ AUTOMATION & DEVOPS ENGINEERING

PowerShell 7+ | Python (Asyncio/FastAPI) | Bash | CI/CD Release Pipelines | Azure Runbooks | Git / GitHub Actions | REST APIs | Automated GPO Audits | Event-Driven Tasks

▶ ENDPOINT & DEVICE GOVERNANCE

Microsoft Intune (MDM/MAM) | Windows Autopilot | SCCM / MECM | Win32 Packaging (.intunewin) | Proactive Remediations | BitLocker Key Escrow | Patch Compliance Governance | Windows 10/11 & macOS

▶ ZERO TRUST & IDENTITY SECURITY

Zero Trust Security | Privileged Identity (PIM) | Conditional Access | SAML 2.0 / OAuth SSO | FIDO2 / MFA | SecOps Hardening | Defender for Cloud | LAPS Administration

▶ ENTERPRISE NETWORKING & STORAGE

LAN/WAN Architecture | Routing & Switching | DNS / DHCP Subnets | IPsec Site-to-Site VPN | WireGuard | Cloudflare Zero Trust | unRAID / TrueNAS NFS | VOIP Telephony & T1/T3

// 03 ENTERPRISE INFRASTRUCTURE EXPERIENCE

Senior IT Infrastructure Consultant • O.S. Consulting, Inc. — Remote | 2025 – Present

- **Enterprise Cloud & Systems Advisory**: Deliver senior-level infrastructure consulting across diverse enterprise client environments, designing scalable cloud architectures, virtual server platforms, and network topologies tailored to compliance and business requirements.
- **Hybrid Identity & Entra ID Modernization**: Architect and execute enterprise migrations from legacy on-premises Active Directory to Microsoft Entra ID (Azure AD), implementing Password Hash Sync (PHS), Seamless SSO, and risk-based Conditional Access policies.
- **Modern Endpoint Transformation**: Modernize legacy SCCM and GPO environments into cloud-native Microsoft Intune configurations; engineered automated Windows Autopilot deployment profiles reducing enterprise hardware onboarding time by over 80%.
- **Tier 3 Root Cause Analysis (RCA)**: Act as the principal escalation architect for complex hypervisor outages, directory replication failures, and network latency anomalies, authoring automated remediation runbooks to eliminate systemic recurring incidents.

Senior Systems Administrator & Infrastructure Architect • BlueMatrix

Durham, NC | 2018 – 2025

- **Global Multi-Site Active Directory Forest**: Architected, built, and maintained enterprise Active Directory forest and domain infrastructure across 7 global data centers and regional offices; tuned multi-site replication topology, site-cost weighting, and distributed DNS to guarantee sub-second authentication worldwide.
- **Multi-Hypervisor Virtualization Clusters**: Administered and tuned high-density virtualization clusters across Linux KVM, Citrix XenServer, VMware vSphere/ESXi, and XCP-NG; orchestrated shared SAN/NFS arrays, vCPU scheduling, dynamic memory allocations, and automated snapshot replication.
- **Azure Cloud Infrastructure & Automation**: Spearheaded phased migrations transitioning mission-critical on-premises systems to Microsoft Azure; architected VNets, Network Security Groups (NSGs), Azure Virtual Machines, and custom Azure Automation Runbooks to govern automated compute scaling and patch compliance.
- **Automated Identity Lifecycle Engineering**: Developed robust PowerShell automation workflows connecting HR systems with AD DS and Entra ID, completely automating provisioning, RBAC group delegation, Microsoft 365 licensing, and zero-day offboarding security revocation.

DevOps Engineer & Systems Administrator • StreamingEdge (Tradition America)

New York, NY (Hybrid) | 2013 – 2018

- **Financial CI/CD Release Pipeline Engineering**: Directed release engineering across a structured 5-stage deployment pipeline (DEV ➔ QA ➔ UAT ➔ Staging ➔ Production) for institutional financial trading systems, coordinating zero-downtime off-hours application releases and configuration verification.
- **Mission-Critical Systems Reliability (99.999% SLA)**: Engineered and administered high-availability Windows Server (2012–2022) and Linux (RHEL, CentOS, Ubuntu) server farms hosting high-throughput financial transaction engines, consistently maintaining five-nines (99.999%) SLA uptime.
- **Clustered Enterprise Virtualization**: Managed fault-tolerant virtualization clusters across Microsoft Hyper-V and VMware vSphere, configuring multi-NIC teaming, virtual switch isolation, host failover clustering, and disaster recovery replication.
- **Enterprise Networking & Perimeter Security**: Designed and maintained high-throughput LAN/WAN routing, core switching, hardware firewalls, site-to-site IPsec VPN tunnels, and enterprise telecommunications infrastructure.

Senior Network Administrator • Digital Network Development

Peoria, IL | 1999 – 2011

- **Enterprise Windows Server Operations**: Commissioned, upgraded, and administered physical enterprise servers spanning Windows NT 4.0, 2000, 2003, and 2008, managing Active Directory, Group Policy Objects, DNS, DHCP, and enterprise storage.
- **Telecommunications & Core Networking**: Engineered, programmed, and maintained managed Cisco switches, routers, multi-building wireless links, T1/T3 telecommunications circuits, and enterprise VOIP telephony platforms.
- **Disaster Recovery & Tier 3 Escalation**: Managed enterprise tape and NAS backup routines, storage arrays, OS bare-metal imaging (WDS/MDT), and routine patch compliance across distributed server farms.

// 04 FLAGSHIP ENGINEERING PROJECTS & OPEN SOURCE TOOLS

Renamarr (Creator & Architect) `github.com/digdast/renamarr`

Engineered a high-performance, open-source media asset organizer with zero-config IMDb/TVMaze metadata suggestions, recursive UNC network share scanning, and an atomic 1-click batch undo ledger.

Pulsearr (Creator & Architect) `github.com/digdast/pulsearr`

Architected an asynchronous Python media suite unifying Sonarr, Radarr, and Prowlarr into a single lightweight daemon; built with FastAPI, asyncio, and SQLite WAL mode (85MB idle RAM vs 1.2GB .NET stack).

Enterprise Intune Automation Catalog `github.com/digdast/Intune-scripts`

Authored and open-sourced 58 production PowerShell automation modules covering Autopilot pre-provisioning, BitLocker cipher detection, driver crash telemetry, and proactive endpoint remediations.

Proxmox K3s Bare-Metal Kubernetes `github.com/digdast/k3s-prox-lxc`

Engineered an automated Ansible deployment framework provisioning lightweight K3s Kubernetes clusters across unprivileged Proxmox LXC containers with cgroups v2 resource delegation.

// 05 INDUSTRY CERTIFICATIONS & TECHNICAL CREDENTIALS

✓ Microsoft Certified: Azure Administrator Associate (AZ-104)

✓ Microsoft 365 Certified: Administrator Expert (MS-102)

✓ Microsoft Entra ID: Administration & Identity Security

✓ CompTIA Network+ Certified

✓ CompTIA Security+ Certified

✓ Inter-Tel University: Telecommunications & VOIP Systems
